\* Set up 20,000 hours for life cycle of incandescent bulb / Difference can occur at depending on the situation.

## Specification

Certificated CE Mark

- **Size**

(G) 114mm x Ø80mm

(T) 115mm x Ø71mm

- **Socket Base** : E26/E27

- **Weight** : 68g

- **Power Consumption** : 5W(±5% )

- **Input Voltage** : 90~245V 50/60Hz

- **Flux** : ( W/W) 330lm

( C/W) 380lm

- **Color Temperature** : 3,000K~6,000K°

- **Life Cycle** : 25,000 Hour

- **Angle** : 230°

- **Subject Matter** : Glass/PC

α Measure standard of life cycle: The life cycle as indicated above is not guarantee. It just design fatigue life. (Condition : -20~+40°)

α Power consumption : Difference(±5%) can occur at depending on the situation.

α There is a little difference Between LED and incandescent bulb (Flux, central brightness)

## Strengths of item

- Made out of the Glass material
  - Hard to discolored
  - High radiant heat compare with other product which made out PC
  - High Durability for scratch
  - Create a luxurious mood
- Environment-friendly products witch certificated safety standards of EU,(Pb Free)
- There is no heat structure because it is not use power LED.
  - Make a full defensive preparation to heat of power source
  - Came true the price competitiveness
- Ball structure - diffuse the light and make a soft beam
- Brightness made by 5W compare with the 13~20W of previous one
- Turn on 4 hours a day, there is no necessary to change about 8 years.
- 75% Power saving compare with previous one.
- 2 years guarantee from days of the purchase
- Certificated CE Mark

### illustration example

- Desk lamp / Table lamp
- Interior decoration lamp for the living room, dining room
- Interior decoration lamp for commercial building  
(Restaurant, Hotel, Show room)

### Caution

● **Can not use the below situation**

- Products or circuit witch has dimmer switch.
- Electrical Products or circuit witch has remote controlled function  
(Except fair presentation)
- HID lamp  
(mercurial lamp, natrium lamp, metal halogen lamp etc.)
- Taxiway light / Emergency lighting fixtures
- **Do not use other Voltage but Appointed input voltage (90~245V 50/60Hz)**
- Enclosed type (or almost enclosed) appliances.  
(In addition to above situation, appliances which is used to much closer or made by red-short material)

**Do not use below the situation**

- **Runny Place / Direct Current**

● **Instructions for use**

- Do not cover the lamp with paper or fabric. take the greatest possible care using near the inflammable material.(Cause of Fire/Heat)
- Do not use for products or circuit witch has dimmer switch. (Cause of Heat/Damage)
- Shot off the power supply During installation, Demolish, Cleaning.(Cause of Electrocution)
- Do not use in runny place or humid atmospheres.(Cause of Damage)
- Do not strike together with hard object. Do not grip the lamp hardly. Do not scratch the lamp.  
(Cause of Damage / Scratch)
- Do not touch the lamp during the turn on the light or immediately after the light out.  
(Cause of Scald )
- Lamp must surely connected to socket.(Cause of Dropping)
- Only use a Indoor place but an outdoor place. Cause of Damage)
